THE VOICE OF
DEMOCRATIC NATIONALISM

Vol. 2, No. 1 | January 1986 | 50¢

"Truth is the most powerful propaganda." - J.F.C. Fuller

U.S. Living Standard in a Nosedive

According to a Census Bureau analysis released in August, 1985, the combined income of a young married couple where both husband and wife work is likely to be less than what either's father made at the same age. This finding was recently reinforced by a study by the Congressional Joint Economic Committee which found that the pre-tax income of a typical middle-class family fell by $3,152 between 1973 and 1984 when adjusted for inflation. The buying power of the ordinary family fell by 11% in 11 years from $28,988 to $25,836, and this is despite the fact that more and more wives have entered or been forced to enter the labor force.

The study stated that almost all of this loss took place between 1979 and 1985 but that between those two years the income of wealthy families with children **increased** by 1.5%. This is, of course, normal in a capitalist society - in good times every one gets richer but the wealthy get richer at a far greater rate than the middle and lower classes, and in bad times the middle and lower classes fall rapidly while the rich normally hold their own. This is because they have the money to buy the legislation that they need to protect and subsidize their interests, and because they have the family, social, business and political contacts they need to find profitable deals or lucrative jobs. It is through this process of nepotism and legal corruption that the ruling class is able to maintain its dominant position in society and feed off the industry of the rest of us. And when hard times come they are the first to talk about sacrifice for the greater good but the statistics tell us on whom the burden of that sacrifice falls. They do not understand or do not want to understand that good leaders not only share the hardships of their people but, in fact, shoulder the greatest part of the burden. Only such leaders command respect and deserve to be followed. A caplitalist leader is too selfish to live simply so that others need not live in poverty.

More facts will complete the picture. For the fifth consecutive year the majority of American workers will get a smaller increase in their wages than the year before. And for most that increase will be smaller than the rate of inflation so they will continue to lose ground. Most unemployed workers become employed again within two years but at earnings that average 30% less than what they were pre-

See NOSEDIVE, page 8

Spying For Racial Reasons

Last year our intelligence services hemorrhaged a great number of spys including several who spyed not just for money but for racial reasons. Sharon Scranage was a Black American CIA employee who was arrested in July for spying for Ghana after failing a routine polygraph test. Retired CIA officer, Larry Wu-Tai Chin, was arrested after 30 years of very successful espionage, apparently from information gathered from the KGB (temporary) defector Yurchenko. Jonathan Pollard, a civilian Naval intelligence analyst, was arrested in November for spying for Israel apparently because he could not keep his mouth shut. He boasted to coworkers about his connections to Israeli intelligence and they informed the FBI. In fact Pollard began bragging in college to classmates that he was working for the Mossad which was grooming him to

From The National Democratic Front's Program Of Democratic Nationalism

THE OWNERSHIP OF INDUSTRY

The National Democratic Front rejects both capitalism and socialism in favor of distributism. The effect of capitalism and socialism is to concentrate the control of industry into the hands of the few - rich capitalists and party bureaucrats respectively. Democratic Nationalism will widely distribute ownership and control of industry, agriculture and commerce.

At present in America over 90% of small businesses fail in the first five years because the government makes it impossible for them to compete against large firms. Big companies purchase the tax breaks, loan guarantees and subsidies they need through their political action committee contributions in a system of welfare for the rich while the small businessman or small farmer is left to his own devices. Americans like to think of themselves as successful entrepreneurs but this is a myth - even Japan, which is not noted for individualistic enterprise, has twice as many small businesses per capita as the U.S. At present half of America's workforce is employed by small business in spite of the hostile economic atmosphere that the rich and their political cronies have created. Under the NDF this percentage will increase greatly as we will encourage small business through low interest loans and free advice and guidance. Small farmers will be allowed to participate in government organized cooperatives that will rent expensive machinery to them at low rates and that will market their produce both nationally and internationally so that they can compete effectively with the huge agribusiness firms.

Large businesses, those with over 100 employees, will become Cooperatives and will be controlled by their workers. The employees, rather than the stockholders, will elect the Board of Directors. The stockholders will continue to receive dividends announced by the Directors. These Cooperatives will be encouraged to maintain low salary structures combined with bonus plans such that the workers will do well only when the Cooperative does well. This organization will all but eliminate labor-management conflict and will thereby make the nation's industry much more vibrant and productive.

Jews Hound Ukrainian

Jews have charged Ukrainian born John Demjanjuk with operating gas chambers which were supposedly used to kill 900,000 Jews at the Nazi Sobvodor and Treblinka concentration camps in World War II. In 1981 the head of the Office of Special Investigations, Neal Sher (who is a Jew), convinced a federal court to strip Demjanjuk of his U.S. citizenship, and in 1982 that court ordered Demjanjuk deported to Israel where he will face a kangaroo court before he is executed. In November of 1985 Demjanjuk's request for political asylum was rejected and he is now appealing to the Supreme Court.

Ukrainians and Poles are especially hated by the Jews because of their long history of anti-Semitism and because they enthusiastically cooperated with the Germans in rounding up the Jews for deportation to concentration camps and Jewish ghettos in the Second World War. This hatred has manifested itself in many miscarriages of justice. For example, Polish born Frank Wallace of Chicago was charged by "Nazi-hunter" Simon Wiesenthal with gassing Jews in Poland. Eleven Jews testified at Wallace's trial that they recognized him as a concentration camp guard who exterminated Jews. After spending $140,000 in legal fees (almost all of it borrowed) Wallace was able to prove that he spent the war on a farm in Poland and the judge dismissed the charges. Not one of the eleven Jews was charged with perjury.

In January of 1985 Ernst Zundel, a German immigrant to Canada, went on trial there at the behest of the Jews for violating an obscure 19th century law which forbids the publishing of "false news". Specifically, Zundel was charged with publishing a pamphlet which maintained that gas chambers did not exist and that the Germans did not have an industry of extermination. Zundel produced an extraordinary number of historians and expert witnesses to testify that gas chambers as they are described by Jews are a scientific impossibility. The French historian Robert Faurisson tesified that there is no physical evidence for the existence of gas chambers

Con't. from page 1

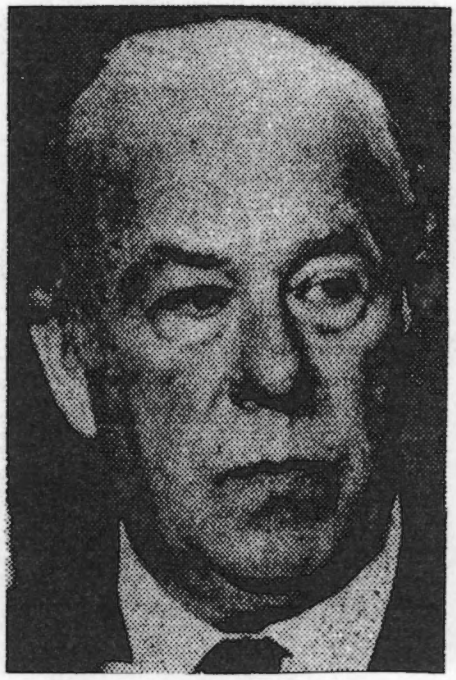
infiltrate American intelligence services, but a background check failed to pick up the information. Pollard and Scranage were born American citizens and Chin was naturalized.

After Pollard was arrested Senator Lugar, the Chairman of the Senate Foreign Relations Committee, was very quick to ascribe his spying to economic reasons. No doubt Lugar remembered the fates of two former chairmen of the Senate Foreign Relations Committee, Charles Percy and William Fulbright, whose political careers ended prematurely when they ran afoul of the Jewish lobby. But Pollard did not spy for money, he was a Jew who identified with Israel from his youth as do most Jews. The Jews believe themselves to be a race and refer to themselves as such in their own publications. In publications that Gentiles read they refer to themselves as a religion, but sometimes they make a mistake as when Ann Landers (a Jew) advised one of her Jewish inquirers that she shoud be proud of her **race.** This racial belief causes Jews to see themselves as separate and apart from other peoples such that American Jews identify not with America but with Israel. This causes them to lead two-faced lives in which they preach internationalism, multiracialism, and pacifism for America, while full-heartedly supporting nationalism, militarism and racial apartheid in Israel. Most Whites would find it very difficult to live in this sort hypocrisy, but the Jews apparently do not. Or maybe they do. Perhaps hypocrisy is the reason that so many of them have psychological problems and find comfort in psychiatric quackery (which was developed largely by Jews). In any case, the Jewish lobby is determined that the American people do not conclude that Jews are in reality aliens and hence a security risk, so they put great pressure on American political leaders to pass the affair off as typical American spying for money and to end the affair quickly. The Jewish press played its part by publishing articles which contended that spying amongst Allies is quite normal, "Easedropping On Allies - In Espionage, Even Friends are Targets" read the title of the **Washington Post** article.

Shimon Peres
Offered an apology that was not an apology.

"Even in America... spying for purely economic reasons is the exception."

Senator Lugar played his part as did Secretary of State George Shultz who looked most undignified in accepting an Israeli apology that was not an apology. Israel's Prime Minister Shimon Peres apologised for "spying on the United States ... to the extent it did take place," but he did not admit that it took place. Nevertheless, Schultz fawned "I think this is an excellent statement, and we are satisfied by it, and we welcome it." We already know to which country Pollard owes his first allegiance, but we must wonder to which country such men as Lugar and Shultz owe their first allegiance, or whether they just think that covering their own asses against the Jewish political hatchet is more important than aggressively pursuing America's interests. It seems that our politicians never tire of appearing ridiculous before Jewish pressure.



George Shultz
Appeared ridiculous in his acceptance of the apology that was not an apology.

Even in America where worship of money is the norm, spying for purely economic reasons is the exception. Spying is a very risky business and for most spys the financial reward is not that great. For example, the Chinese government paid Wu-Tai Chin $140,000 over 30 years which amounts to an average of just $4600 a year. Not very much for a man who is risking life imprisonment or possibly the death penalty. Most spys are either disaffected with their own government or more loyal to another government. The Ghanaian intelligence service knew that it would be easier to seduce a Black into

"The Jews believe themselves to be a race."

spying for a Black country than a White. The Orientals rely primarily on Yellow people in America for espionage as they are more likely to identify with the nations of Asia. Experts have estimated that up to 30% of the Vietnamese Boat People that came to America could be spys. Some spy for Vietnam and some spy for China as most of the Boat People were in fact ethnic Chinese who were forced out of Vietnam because the Chinese community refused to assimilate. This refusal is typical of Chinese around the world as they consider their race and their culture to be superior to all others. For centuries Chinese communities have survived in most Asian countries with their racial and cultural identity intact.

"Israel blackmailed, bugged and bribed U.S. officials."

One good thing did come of the Pollard affair and that was the light cast on past Jewish acts against the U.S. which are rarely raised when Israel is discussed by the media. For example, The ABC Nightline Program featured the Pollard story on its November 24th show. During the course of the program the 1967 attack on the American intelligence ship USS Liberty in which 34 of our sailors died was mentioned, but ABC of course failed to state that the attack was intentional and not a mistake as the Jews claim. The fact that 200 pounds of weapons-grade plutonium stolen from U.S. nuclear facilities ended up in Israel was mentioned but ABC failed to mention that the head of the Atomic Energy Commission at the time was a Jew. Also it failed to mention that Israel just recently illegally acquired trigger devices for atomic bombs from the U.S. Nevertheless, we must applaud Ted Koppel for speaking the unspeakable when he asked former NSA chief Bobby Inman whether Israel could get away with anything it did to America. Inman skirted the question and Koppel did not press with his usual zeal, but we were surprised that he even asked the obvious question.

The **Washington Post** also discussed things that are in the public record but which most Americans do not know about because the press has given them so little attention. For example, it mentioned that when the Iranian students seized our embassy they published our intelligence documents that they found there. Included was a CIA assessment that said that Israel had blackmailed, bugged and bribed U.S. officials in search of secret information concerning Israel and technical, scientific information.

Larry Wu-Tai Chin
Spied for less than $5,000 a year.

The Jews have never assimilated into any nation that they have lived in since the Diaspora because they believe themselves to be a race, and a race with a special destiny - "the Chosen People". And that is why they have survived as a people to this day. It is a pipedream to think that they will change their historical character and assimilate into and identify with America. The Pollard case is just the tip of the iceberg. Jews throughout our governmental bureaucracy are more loyal to Israel than to America and demonstrate their loyalty by passing information, and plutonium and nuclear triggers to their brethren.

Hounding

Con't. from page 2

and no documentary or historical evidence for the existence of an industry of extermination.

Faurisson had himself been prosecuted in France, at the behest of the Jews, for "racial defamation" in concluding from his research that the Holocaust story is an historical lie. In the Faurisson trial, as in the Zundel trial, the Jews could not produce one witness who would state that they actually saw Jews gassed. The Faurisson court said in its judgement that Faurisson's work was scholarly and well-researched and that they could not say whether it was wrong or right, nevertheless his statements had hurt the reputation of the Jews therefore he was guilty of "racial defamation".

In order to avoid this sort of Alice-in-Wonderland judgement, the judge in the Zundel trial instructed the jury that the Holocaust was an historical fact, despite the mountains of evidence presented to debunk it, therefore the jury had no choice but to find Zundel guilty of publishing false news. The Zundel case is presently on appeal.

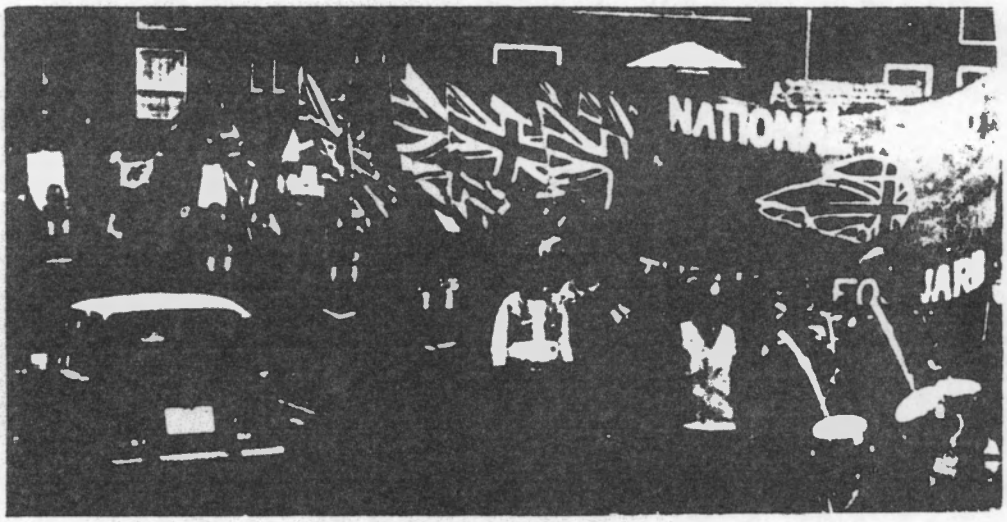
In the Nuremberg Trials after World War II hundreds of Jews testified that Jews were gassed in Germany itself, but during the Zundel trial the most famous and respected of the Jewish Holocaust historians, Raoul Hilberg, admitted 1) that there where no gas chambers in Germany itself, 2) that the Allies tortured various Nazis into confessions, and 3) that he never visited any concentration camp before he wrote his book on the Holocaust. The only evidence for the Holocaust is the testimony of Jews, the same sort of testimony that many Jewish historians now admit was fabricated in the Nuremberg Trials.

Nevertheless, John Demjanjuk will be sent to Israel to satisfy the blood-lust of the Jews and to perpetuate the Holocaust myth that has proven to be so remunerative for Jews in terms of reparation payments from Germany and foreign aid to Israel. And the greatest crime of all, that of historical lying, will continue to go unpunished -- but not forever.

Lessons from Britain's National Front

By Gary Rossi

In 1985, I spent several months working with the National Front and learned much that can be applied to building a National Revolutionary Movement in America. The leaders of the National Front were very warm and forthright and within a short time of my arrival I felt as if I was amongst trusted comrades. They were eager to teach what they knew and were surprisingly open to suggestions. It was an inspirational trip and one which will greatly help the development of the National Democratic Front. What follows is an analysis of of the most important things I learned from our British comrades.



NF on the March

The National Front is a household name in Britain. This is because the NF has a corps of leaders and activists who produce and distribute a tremendous amount of propaganda including a monthly newspaper(**The National Front News**), a monthly magazine(**Nationalism Today**), a quarterly journal(**New Nation**), and tens of thousands of leaflets and posters on particular issues. Further, each branch produces its own "patriot" leaflet or magazine which concerns itself primarily with local problems and NF solutions to these. The newspaper and magazines are sold to members and the public; only the leaflets are distributed free. The newspaper and the two magazines now make a profit. The newspaper is inexpensive (about $.20) and so can be sold on the streets, at sporting events, and door to door. Approximately 9000 must be sold in order for the NF to break even on an issue.

The NF is able to do all of the above on less than $65,000 a year (last year's income) because of the extraordinary capacity for sacrifice of its leaders. There is not one of us who lives as poorly as a top NF leader. They survive on between 25 Pounds($32) and 80 Pounds($105) per week depending on their position in the Party. Everything is done on a shoe string for lack of resources; for example, their light table for paste-up work consists of a piece of broken glass laid between two desks with a lamp placed on the floor beneath it. Only two members of the leadership own cars (if they can be called such) and these are used for party purposes when they are operating. We have much to learn from the NF in regard to revolutionary self-sacrifice.

Since the National Front is so well known and since it has its own distribution network, it cannot be ignored by the press. Instead the media has chosen the strategy of strident attack to discredit the Front and paint its members as violent thugs. This attempt to "criminalize" the NF backfired last summer in the case of the Brussels soccer riot. The press picked up the claim of Liverpool Football owner John Smith that the NF started the riot in which 37 died. The press pushed the story hard for several days but had to back off when it became obvious that they had no evidence to support their charges. The NF took advantage of the media's embarrassment by putting out a satirical poster and a leaflet detailing all of the past charges of the press against the NF which proved to be false. The Liverpool police eventually announced that they could find no evidence that members of the National Front were involved in the Brussels riot. Now it is the press that has been discredited and this will be a substantial advantage for the NF in the future, particularly if the government attempts to ban the NF as a "criminal" or "terrorist" organization. The NF constantly issues press releases at both the local level and the national level. It has abandoned the view that even bad publicity is good for the Party and fights hard to create a good, though unconventional, image for itself.

The National Front is now much smaller than it was in the late 1970s but it is much healthier. It is ideologically sound and its talented leaders are young yet experienced as all joined the Movement at a very young age and struggled to make it ideologically pure. The present leadership fought and eventually overthrew both John Tyndall (in 1980) and Martin Webster (in 1983). Prior to the purge of Webster in November of 1983 the NF was in the "racialist ghetto", that is it was seen as a one issue pressure group. Now it has a world view and policies on virtually every issue of concern to Britons including redistribution of the wealth, unemployment, environment, education, crime, trade, foreign relations, etc. It is attempting to capture certain issues such as drugs and animal cruelty (anti-vivisection) and pull them out of the System's hat by pushing hard on them just as the public is becoming aware of these as important problems.

The old leadership of Tyndall and Webster had to go because it was reactionary and had no ideas

except to get the WOGS out. It did not understand enough about the pluralistic System to know what was wrong with it, and so did not oppose Plutocracy or Capitalism. Thus when the Conservative Party under Margaret Thatcher captured the immigration issue by declaring in 1979 that Coloured immigration must come to an end, the National Front disintegrated. Its only concern had been coopted by the System, or so it seemed to most of the supporters of the NF who were in reality only racist Tories.

These reactionaries thought that the Parliamentary System was a good thing, except that the leaders of the country just did not understand the Race threat, so in 1979 they left the NF in droves to follow Thatcher. In the late '70s the NF was getting between 15% and 30% of the vote whereas in the early '80s it was getting 1-2% of the vote. Thatcher, of course, reneged on her promise to stop Coloured immigration as the NF fell to pieces and could no longer act even as an effective pressure group. Her duplicity will no doubt help the NF in the long run, but the short term damage was done and it almost destroyed the Party.

But as Nietzche said, the blow that does not kill makes one stronger. The National Front is now a truly revolutionary organization and its members are inspired by their faith in their radical ideology. The NF rejects the materialism of Communism and rejects the materialism of Capitalism. It sees man not as an economic animal but as a spiritual being who wants to live for something greater than himself. As true nationalists, they identify with their nation and are willing to sacrifice their well-being and even their lives if necessary to help their people survive and achieve. And that is why the NF is now able to attract high quality young activists - brilliant youths who are seeking a dynamic and intelligent ideology to give meaning to their lives, something which the Individualism of the System cannot give them. The mission-conscious do not want to serve themselves, rather they want to serve their people, and it is these people that a National Revolutionary Movement must attract if it is to succeed.

The National Front is no longer a typical political party that will compromise its principles to gain power. The NF preaches the **Truth** as it sees it, and when the collapse of the corrupt Old Order comes the people of Britain will remember who was honest and who refused to compromise with Evil. They will respect the purity and the vision of the National Front and will turn to it for salvation.

In terms of tactics, the National Front seeks to spread its message and recruit new members by "sinking local roots". This means several things. Firstly, instead of dissipating time and energy each branch concentrates the efforts of its activists in a "target ward". This is an area of about 15,000 - 20,000 people of the right type, i.e. at least 80% white and working class or lower middle class. This target ward is leafleted and postered and then newspapers are sold in the ward both on the streets and door to door. Door to door selling is particularly important as it establishs personal and continuing contact between the Movement and the community. Leafletting and selling go on day after day, week after week, month after month in the target ward until the organizer believes that no more members can be gotten from the area. Usually target wards are changed only once a year, repetition being the key to successful propaganda.

Martin Wingfield
Editor of NF News who was recently imprisoned under the infamous Race Relations Act for describing the threat of Black crime.

The NF also conducts marches and demonstrations. The marches are particularly effective in establishing the psychological presence of the NF in a town or district. The marches are usually jeered and sometimes attacked by the Reds. The NF takes no violent action until it is attacked, rather it attempts to be as disciplined as possible. Police harassment including body searches are common on NF activities. The marches have a very positive effect on NF supporters and demoralize the opposition, particularly when they see groups of local white teenagers join the march.

We of the National Democratic Front have learned much from the NF. We are establishing cells around the country, a cell being a group of 4 or more **activists**, which pick a target ward of working or lower middle class people and work it over and over again. The target ward is leafleted and then newspapers are sold door to door and this goes on month after month after month. A mailing list is fine for raising money but not for getting the message out to the people at large and not for building a relationship with the communities that we need to support our Movement. A revolution cannot be built on a mailing list. It can only be built with the support of masses.

The NDF does not claim that many ordinary people will join the Movement in the beginning. What we are looking for now are those of great courage and conviction, people who have the heart to actively recruit others and to spread our propaganda. The masses will join us later when the System comes falling down around their heads. Then they will seek a radical alternative to the corrupt Old Regime, and they will turn to us if they know about us. And they will know about us if we can attract enough bright and energetic activists to our Cause.

What we need now are those who will fight because the know it is right to fight , not because they see any likelihood of imminent victory. We need Political Soldiers who have the courage to live honorably and to die honorably if necessary. For those of you who fit this description we ask that you attempt to build an NDF cell in your area, and if that is not possible then we invite you to come live in the Washington-Baltimore area where we have established our National Headquarters and help us build here. We hope to hear from you.

The Lost Generation

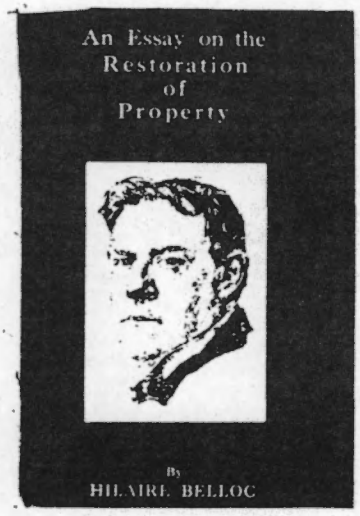
On Nov. 2, 1985 the Education Commission of the States released a study on children who are "disconnected from society" as a result of drug abuse, delinquency, pregnancy, dropping out of school, and unemployment. The study estimated that approximately 15% of those between the ages of 16 and 19 fall into this category for a total of 2.4 million alienated children, and of these 1,250,000 are White.

The study paints a bleak picture of the disintegration of the social fabric of the nation. It found that alcohol and drug abuse has increased amongst teenagers by 6000% since 1960, teenage pregnancy has more than doubled for Whites since 1960, murder by White teenagers has increased by 232% since 1950, and teenage suicides have increased by more than 150% since 1950. The study says that business has already been adversely affected by the above trends as employers are finding it more and more difficult to find reliable entry-level employees.

The study focuses on destruction of the family structure and the rise of the unwed mother as major causes of the above problems, but these are symptoms not causes. The cause is the disease of Self-Interest. In a cutthroat society that is dedicated to material acquistion and pleasure seeking those who cannot compete effectively are left to fall by the wayside, and those who refuse to compete because they want to live for something greater than self-seeking are lost.

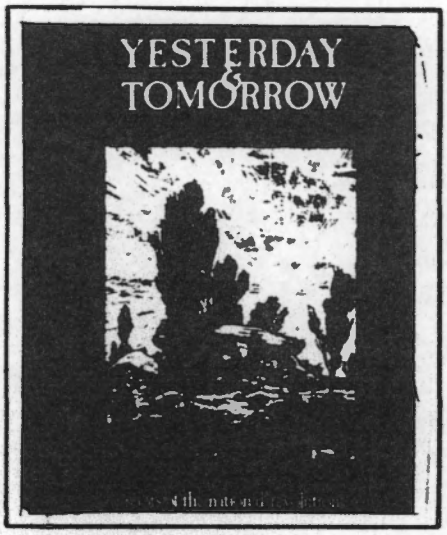
Liberals and conservatives, Republicans, Democrats,and Libertarians, have all embraced and fostered this Individualism and its Self-Interest Ethic. They differ only in the tactics by which they seek to impose it on us. The Libertarians want no government at all so they can be completely free to exploit those of lesser intelligence, energy or power(i.e. money). The conservatives want only so much government intervention as will help them further their plans, but they will give to the underclasses enough to keep them in their place and out of the hands of revolutionaries. The liberals too recognize the importance of buying off the lower classes, but they are also driven by a sense of guilt for what they are doing and so are willing to give a bit more than the conservatives, particularly as this helps them at the polls. But none of them want to change the situation so radically that there are no underclasses -- so that there is only one united people without class consciousness. That would completely destroy the individualist's game as his ultimate object is to advance his own interests and this must usually be done at the expense of others and is always done at the expense of the nation and the unity of the people. We will not be able to recover our lost generations until the cancer of Individualism is cut out of the body politic.

ESSENTIAL READING FOR THE NATIONALIST:



THE RESTORATION OF PROPERTY
by Hillaire Belloc, 78pp., $8.00.
This is a crucial work on the alternative to capitalism and communism by one of the founders of the Distributist Movement.

YESTERDAY & TOMORROW
Edited by Rising Press, 96pp., $8.00
An excellent compilation of some of the best Nationalist writings of the twentieth century.



THE POLITICAL SOLDIER
BY Derek Holland, 16pp., $3.00.
This inspirational pamphlet explains the Political Soldier concept and why the Nationalist Movement needs such men.

Make all checks payable to: The Nationalist, Suite L-290, 444 N. Frederick Ave., Gaithersburg, MD 20877.

FIGHT THE EVIL TWINS!

THE COMMUNISTS SAY:

1) That man is an economic animal whose material needs can best be satisfied by Communism.
2) That all men are created equal and that there are no genetic mental or psychological differences between individuals, between races or between sexes.
3) That life is a struggle of classes in which the working class will eventually destroy the other classes to establish an international utopia where men will live in comfort **as individuals.**

THE CAPITALISTS SAY:

1) That man is an economic animal whose material needs can best be satisfied by Capitalism.
2) That all men are created equal and that there are no genetic mental or psychological differences between individuals, between races or between sexes.
3) That life is a struggle of **individuals,** not races-- not nations, and that only the strongest individuals should survive and prosper-- the hell with the rest.

THE NATIONAL DEMOCRATIC FRONT SAYS:

That materialism cannot satisfy the psychological needs of man. That man does and must identify with his own kind in order to give his life meaning. That life is thus the struggle of Peoples-- of Nations-- and that the Nation that is united and well-led will survive, prosper and achieve. That we are tied in spirit to our ancestors and to our descendants to whom we must be true, so that for Nationalists living and dying is of secondary importance to **how** we live and **how** we die.

Does love of family make you rich? Does service to Nation make you rich? Does devotion to Race make you rich? **No, they do not!** So how can money be the measure of a man? And yet it is in Capitalist America. Our mission is to destroy this corrupt order that has perverted the spirit of our People and to build a great and human order in its stead. We of the NDF will not rest until we are victorious-- we will live honorably and we will die honorably until the phoenix of the New Nation rises from the ashes of the Old Regime.

JOIN OUR STRUGGLE TO SAVE OUR PEOPLE AND OUR NATION!

Whites Fight Back in Philadelphia

Last November 20th, 400 Whites demonstated in the Elmwood neighborhood of Southwest Philadelphia outside the home of a Black couple. The purpose of the demonstration was to convince the Blacks, Charles and Marietta Bloxom, that they were not welcome and should move out. They got the message and agreed to leave. The next night about 200 Whites demonstrated outside the home of an interracial family that had just recently moved in. But the Fox family decided to stick it out. They are being guarded day and night by police, and Black Mayor Wilson Goode declared a state of emergency even though neither demonstation was violent.

The Whites in Southwest Philadelphia are in revolt but they will be crushed by the Black city administration. White resistance has been ground into the dust in one city after another because Whites do not yet understand that the System is the enemy of our blood. Only organization of the White masses into a National Revolutionary Movement can save our people. But the day is not long off when Whites will get tired of running and will turn like cornered tigers on the corrupt plutocrats and capitalists who have sold out their race. And when that day comes the NDF will be there to lead them.

Nosedive

Con't from page 1

viously earning. This means that a lower middle-class person who becomes unemployed is often driven into the ranks of the poor. In 1978 11.4% of our population lived below the poverty line; in 1984 14.4% of Americans lived in poverty including 18 million Whites.

After the revolution the NDF will extend to the ruling class the same good will and social justice which they extended to their fellow Americans. Or to paraphrase a noted religious leader: the rich capitalist will have as much chance of passing into the new National Democratic Order as a camel has of passing through the eye of a needle.
